

Case Study

"Not all stains are created equal"

Type of Mark/ Stain?	Age of stain?	Material type?	Application details.	Conclusions.
Pen line, Biro	Unkown	Cotton	1 Overnight Application	Use Absorbent Cloth

Additional comments: A simple pen line deposits only a small amount of ink so should be easy to remove, given time. With this application use an absorbent towel behind the mark will stop mark transfer. **APPLY:** With an absorbent towel behind the mark "Dab, Dab, Dab" forcing the **MX14** solution through the material, this will start the cleaning action. **LEAVE:** When applied you will be able to see when the mark is starting to breakdown, if you have caught it early enough then this may be a few minutes, otherwise it may need an overnight soak. Keep applying the **MX14** to ensure the area does not dry out. Remember "Dab, Dab, Dab" **WASH:** Remove the solution and stain by washing in cold water, or if you wish use a "Whites Wash" up to 60c.
